

TRIDENT D200 SUBSEA EM RECEIVER

Product Overview

Propipe's Trident D200 is a subsea Electromagnetic Receiver that can be used by both divers & ROV's. It is designed to be used as a pig locator & pig signaller allowing the operator to carry out a range of subsea operations with a single unit.

This receiver has been designed with ease of use and accuracy of signal display in mind. Therefore the D200 Receiver is equipped with an LED user interface screen. The screen allows the operator to cycle through menu options and view a live signal trace. All units are powered by a rechargeable internal battery.

All controls and functions of the D200 Receiver can be operated subsea by a diver (Preset the unit when used with an ROV).

Button functions include:

- *Power up
- *Shutdown
- *Frequency change
- * Gain Increase / decrease

Technical Specification

Housing Material	Aluminium/Acetal
Length	375.0mm (inc. antenna)
Diameter	115.0mm (main housing)
Weight	3kg
Operating Depth	200m
Operating Frequency	10Hz to 30Hz
Operating Temperature	-5°C to +50°C
Power Source	+9V NiMh (Rechargeable)
Battery Life	3 Days

D200 Signal Output
